Notes	64

Wiper Technik established itself in the UK market place back in 2001, specializing in the supply of OEM quality conventional and flat blade design wiper blades for car, LC and CV applications with fuel caps as an additional range.

Thanks to strong demand from our customers over the past 10 years for OEM quality fuel caps, we have been able to develop our range of fuel caps into one that is recognized as the high quality alternative to those supplied by OE manufactures.

Our continuous development programme ensures we always have the most up to date applications available and we have now achieved one of the most extensive ranges of both locking and non locking fuel caps.

Further expansion has seen the addition of AdBlue caps fitted to vehicles fitted with a Urea tank.

For our comprehensive range of wiper blades we refer to our separate car and CV wiper blade catalogues.

Our customers are our most important asset and customer satisfaction is our mission.

Technical

The security of a Wiper Technik fuel tank cap does not lie in its anti-theft function alone. Each individual component is precision manufactured from high quality OEM type materials.

Once assembled all Wiper Technik fuel caps undergo a strict series of tests before packing to ensure optimum quality at all times. In addition, production samples are regularly chosen and subjected to long duration tests for opening and closing of the lock, along with operational tests of the disc and seals.

Where required, the cap is fitted with a valve that allows decompression of the tank either during use or on refill. This minimizes the vapor escaping into the atmosphere, reducing its effect on the environment.

All caps are manufactured to EEC directive 70/221 ensuring safety during operation.

The recently introduced range of blue caps as fitted to the Urea tank has all of its components protected against AdBlue corrosion, ensuring the long life of the cap.
